

TIMUR SHASHOK

Kyiv, Ukraine · TimurSashok@gmail.com · [LinkedIn](#) · [Telegram](#) · [Github](#) · +380990945112

EXPERIENCE

- **Resk** Kyiv
Junior System Administrator 2025.06 – 2026.2
 - **Infrastructure Support:** Maintained and troubleshot Windows and Linux workstations, resolving hardware, software, network, and user-access issues.
 - **Network Administration:** Configured and monitored local network infrastructure, including TCP/IP, DNS, DHCP, routers, switches, and shared resources.
 - **Automation:** Automated repetitive administrative tasks using PowerShell and Bash, reducing manual maintenance and improving operational efficiency.
 - **Tech Stack:** Windows Server, Linux, PowerShell, Bash, TCP/IP, DNS, DHCP, Active Directory, Git, VMware.

EDUCATION

- **Marine, River Fleet College. Kyiv State Maritime Academy** Kyiv, Ukraine
Software Engineer; 3 Course 2028
 - * **Programming:** Studied software development with a focus on C++, Java, object-oriented programming, algorithms, and data structures.
 - * **Software Engineering:** Developed academic projects using structured programming, OOP principles, Git, debugging, and software development practices.
 - * **Computer Science:** Studied computer networks, operating systems, databases, computer architecture, and software engineering fundamentals.

PROJECTS

- **NOXA — AI Design Analysis Platform** Remote
Founder & Full-Stack Software Engineer 2026
 - **Product Development:** Built and deployed an AI-powered SaaS platform that analyzes UI/UX designs and provides automated design insights and scoring.
 - **Architecture:** Designed a full-stack architecture using Next.js, TypeScript, Supabase, PostgreSQL, and server-side actions.
 - **Backend Engineering:** Implemented authentication, private file storage, Row-Level Security, usage limits, database operations, and secure design-upload pipelines.
 - **Engineering:** Designed validation, error handling, responsive interfaces, and production-ready application infrastructure with a focus on security and scalability.
 - **Tech Stack:** TypeScript, Next.js, React, Supabase, PostgreSQL, Tailwind CSS, Git, AI/LLM APIs.
- **TERMINAL GRAPHIC EDITOR** Remote
C++ Software Engineer 2026
 - **Image Processing:** Developed a terminal-based image editor in C++ with support for core image manipulation and processing operations.
 - **Architecture:** Designed the application using object-oriented programming principles, modular components, and reusable processing algorithms.
 - **Algorithms:** Implemented pixel-level image transformations and processing operations with a focus on performance and memory efficiency.
 - **Engineering:** Applied C++ standard libraries, file I/O, data structures, error handling, and debugging throughout development.
 - **Tech Stack:** C++, STL, OOP, Algorithms, Data Structures, File I/O, Git.

TECHNICAL SKILLS

- **Languages:** Java , C++, SQL, AI
- **Engineering Software:** Visual Studio Code 2026, Visual Studio Community 2026, Codex, IntelliJ IDEA, LabVIEW.
- **Developer Tools:** Git, Docker, Windows, Linux
- **Theoretical Knowledge:** Algorithms, Data Structures, Operating Systems, Computer Networks, Object-Oriented Programming.

HOBBIES & INTERESTS

- **Interests:** Physics, Mathematics, Programming, Artificial Intelligence, Technology, Astronomy, Robotics, Engineering, Computer Science
- **Activities:** Gym, Reading, Personal Projects, Learning New Technologies, Problem Solving
